

SUMMER ALEKS SUBSCRIPTION REGISTRATION

Fairfield Christian Academy has used ALEKS as a platform for math instruction for over 5 years. Many students in grades 6-8 use ALEKS during the school year. ALEKS is an on-line math program (full description below). FCA is offering a summer (90 day) subscription to ALEKS for families who may want an opportunity for continued math work in the summer. Research indicates that practicing over the summer not only helps students retain math concepts, gain confidence and sharpen their skills, but enables them to be ready for math at the beginning of the new school year. The summer subscription is an independent offer for students to use over the summer months while away from the classroom. **If you are unsure if your child would benefit from the summer ALEKS Math subscription, please speak with your child's classroom teacher and he or she will be able to offer some direction.**

The summer ALEKS subscription is for 90 days from the date of registration. Students will access their accounts at home via a device that has internet capability/access. The website is available 24/7. Each subscribing student will receive a LOG-IN and PASSWORD that will be sent to the email address you have provided on the registration form. Please remember your log-in and password.

Subscription start date is scheduled for MAY 31, 2019

You are encouraged to go to **ALEKS.com** to take a tour and review all that is offered via the ALEKS program. Mrs. Barthelmas coordinates this program for FCA. If you have questions about the program please send her an email at cbarthelmas@fcaknights.us.

Special Note: If your child is already enrolled in ALEKS, the \$25.00 fee will extend his/her current subscription for 90 days and permit him/her to continue work in his/her current course. Your child will advance as he/she completes the course.

ALEKS Math Description:

Assessment and LEarning in Knowledge Spaces is a Web-based, artificially intelligent assessment and learning system. ALEKS uses adaptive questioning to quickly and accurately determine exactly what a student knows and doesn't know in a course then instructs the student on the topics he is most ready to learn. As a student works through a course, ALEKS periodically reassesses the student to ensure that topics learned are also retained. ALEKS also provides the advantages of one-on-one instruction, 24/7, from virtually any web-based computer.

ALEKS Math 90-day Summer Subscription

To register, please return the completed form and **\$25.00** (checks payable to FCA)

by **Friday, MAY 3rd** to:
